

IOC IRRIGATION

FIELD PARTNER PROGRAM

Do you serve buildings with irrigation problems?

Bring the new IOC technology and earn premium income for each approved property.

You already know the problem. IOC turns it into visible value: office visibility, less schedule blame and a real solution.

$$\begin{matrix} \$300 \\ \text{deployment} \end{matrix} + \begin{matrix} \text{up to} \\ \$700 \\ \text{connection} \end{matrix} = \begin{matrix} \text{up to} \\ \$1,000^* \end{matrix}$$

\$300

Physical deployment

Connect IOC modular node(s).
Complete field installation.

up to \$700

Connection premium

Open the conversation.
Make the solution visible.

IOC controller with SIM/cellular

No weak Wi-Fi dependency. Management gets office visibility.
Modular system: each node handles up to 6 zones; add nodes as needed.

More approved buildings = more premium income.

*Payment subject to site review, project approval, closed sale and final IOC activation.

IOC IRRIGATION

HOW THE OPPORTUNITY WORKS

You know the problem. IOC helps turn it into a premium upgrade for the property.

1 Spot it

Old controller, weak Wi-Fi, confusing schedules, overwatering, stuck valves or no office visibility.

2 Send photos

Controller, zone wires, power source and approximate number of zones. IOC reviews the site at no initial cost.

3 Present it

"New irrigation technology can solve this. I can help install it; IOC activates and supports it."

4 Install & earn

If approved, you help deploy it. IOC activates the system and you earn premium income.

What you gain

- ✓ Approved premium income
- ✓ Simple field installation
- ✓ Less schedule blame

Pass it to a friend

If they serve buildings with irrigation problems, they can bring IOC and open another premium opportunity.

Modular system: 6 zones per node

Install 1, 2, 10 or more nodes. From one small building to a campus.
